## Investor Presentation

Kadant Inc. (NYSE: KAI)  
May 2026

# Forward-Looking Statements

The following constitutes a “Safe Harbor” statement under the Private Securities Litigation Reform Act of 1995: This presentation contains forward-looking statements that involve a number of risks and uncertainties, including forward-looking statements about our future financial and operating performance, demand for our products, and economic and industry outlook. These forward-looking statements represent our expectations as of May 5, 2026. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events, or otherwise. These forward-looking statements are subject to known and unknown risks and uncertainties that may cause our actual results to differ materially from these forward-looking statements as a result of various important factors, including those set forth under the heading "Risk Factors" in Kadant’s annual report on Form 10-K for the fiscal year ended January 3, 2026, and subsequent filings with the Securities and Exchange Commission. These include risks and uncertainties relating to adverse changes in global and local economic conditions; the variability and difficulty in accurately predicting revenues from large capital equipment and systems projects; our acquisition strategy; levels of residential construction activity; reductions by our wood processing customers of their capital spending or production of oriented strand board; changes to the global timber supply; development and use of digital media; cyclical economic

conditions affecting the global mining industry; demand for coal, including economic and environmental risks associated with coal; failure of our information systems or breaches of data security and cybersecurity incidents; implementation of our internal growth strategy; competition; our ability to successfully manage our manufacturing operations; supply chain constraints, inflationary pressure, price increases or shortages in raw materials; loss of key personnel and effective succession planning; future restructurings; protection of intellectual property; changes to tax laws and regulations; climate change; adequacy of our insurance coverage; global operations; policies of the Chinese government; the variability and uncertainties in sales of capital equipment in China; currency fluctuations; changes to government regulations and policies around the world; compliance with government regulations and policies and compliance with laws; environmental laws and regulations; environmental, health and safety laws and regulations impacting the mining industry; our debt obligations; restrictions in our credit agreement and note purchase agreement; soundness of financial institutions; fluctuations in our share price; and anti-takeover provisions.

# Use of Non-GAAP Financial Measures & Company Estimates

In addition to the financial measures prepared in accordance with U.S. generally accepted accounting principles (GAAP), we use certain non-GAAP financial measures, including increases or decreases in revenue excluding the effect of acquisitions and foreign currency translation (organic revenue), adjusted gross profit, adjusted gross margin, adjusted SG&A, adjusted operating income, adjusted net income, adjusted EPS, earnings before interest, taxes, depreciation, and amortization (EBITDA), adjusted EBITDA, adjusted EBITDA margin, free cash flow, and adjusted free cash flow.

Specific non-GAAP financial measures have been marked with an \* (asterisk) within this presentation. A reconciliation of those numbers to the most directly comparable GAAP financial measures is shown in the Appendix and in our first quarter 2026 earnings press release issued May 5, 2026, which is available in the Investors section of our website at [investor.kadant.com](http://investor.kadant.com).

We believe these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information regarding our performance by excluding certain items that may not be indicative of our core business, operating results, or future outlook. We believe the inclusion of such measures helps investors gain an understanding of our underlying operating performance and future prospects, consistent with how management measures and forecasts our performance, especially

when comparing such results to previous periods or forecasts and to the performance of our competitors. Such measures are also used by us in our financial and operating decision-making and for compensation purposes. We also believe this information is responsive to investors' requests and gives them an additional measure of our performance.

The non-GAAP financial measures included in this presentation are not meant to be considered superior to or a substitute for the results of operations or cash flows prepared in accordance with GAAP. In addition, the non-GAAP financial measures included in this presentation have limitations associated with their use as compared to the most directly comparable GAAP measures, in that they may be different from, and therefore not comparable to, similar measures used by other companies.

# Company Overview

# Company Attributes

## Kadant's DNA

- Technologies that drive Sustainable Industrial Processing®
- Stable business model with recurring revenue of high-impact solutions with “sticky” customer relationships
- Over 70% of revenue from parts and consumables
- Growing end markets driven by global macro trends
- Decentralized structure, asset-light operating model
- Excellent financial performance and free cash flow\* generation
- Focused capital allocation and proven record of value-creating acquisitions
- Experienced management team

# Global Platform, Local Presence

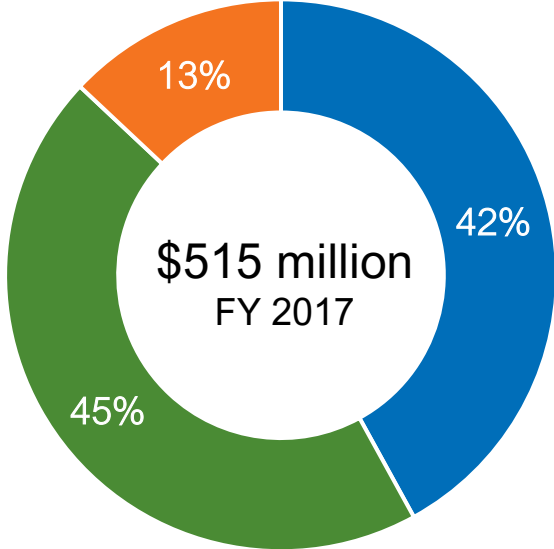

Geographic revenue (FY 2025) is attributed to countries based on customer location

# Accelerating Growth: Diversifying Our Strategic Mix

## Aligning growth with long-term strategic vision

- Secular growth trends
- Infrastructure investment needs
- Global supply chain trends
- Evolution of the circular economy

# Growth Trends

# Global Trends Supporting Growth Opportunities

- **Decarbonization and electrification** driving demand for energy-optimized systems and new technologies utilizing green energy
- **Disruptive technologies** enabling new applications by increasing adoption of automation, advanced robotics, artificial intelligence, and rapidly expanding connectivity within process industries
- **Population growth and demographic shifts** creating opportunities, compounded by labor shortages, aging workforce, and skills gaps
- **Urbanization and aging infrastructure** stimulating demand for convenience goods; recycling and waste management; and investments in infrastructure
- **Sustainability and environmental responsibility** fueling demand for increased use of recyclable (cellulose) materials to preserve and secure natural resources

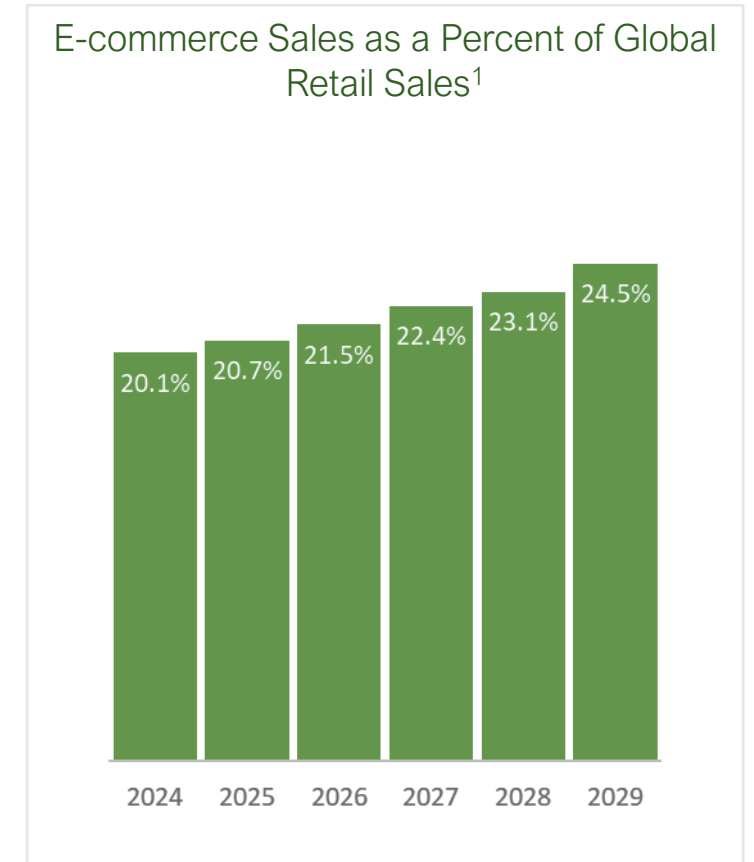

# Key Market Drivers Enabling Kadant's Growth

- Home delivery increasing demand for packaging and containerboard
- Growing consumer demand for sustainable materials
- Demographics and housing demand driving wood industry
- Need for global infrastructure to support economic growth
- Smart technology increasing industrial connectivity

# Home Delivery Driving Packaging & Containerboard Demand

- U.S. e-commerce sales are expected to grow 11% annually through 2029<sup>1</sup>
- Increase in demand for containerboard used to produce corrugated boxes
- Fiber-based packaging materials are a core element of the circular economy

# Consumer Demand for Sustainable Materials

- Greenhouse gas emissions and plastic pollution are driving markets toward more environmentally friendly alternatives
- Increase in European and U.S. regulations reducing demand for select single-use plastics
- Migration from plastic to cellulose-based material in packaging, bags, straws, water bottles, etc. is underway
- Societal preference shift leading to greater demand for cellulose-based, recyclable materials

# Demand for Lumber and Engineered Wood

- Long-term demand remains robust
- Wood-based buildings offer lower carbon footprint versus concrete or steel
- Growing use of cross-laminated timber (CLT) in taller buildings
- Housing construction in Europe starting to transition from concrete block and brick to wood

# Infrastructure Build-out

- The Federal Government has allocated \$350 billion for heavy infrastructure investments in the U.S.<sup>2</sup>
- Building infrastructure requires material and minerals, driving demand for efficient mining and material processing equipment
- Our material handling products increase efficiency in mining and material processing leading to considerably less water and electricity used in the process

# Digitalization, Automation, and Smart Technology

- Smart technology is enabling industrial processes optimization across multiple systems and physical locations, delivering real-time data analysis and actionable insights
- Digital ecosystems are gaining traction across industrial enterprises as interconnectivity grows
- Our digital platform, illumina.X, is a framework for industrial digitalization that combines products, data, and analytics to enhance plant productivity and improve efficiencies

# Our Sustainability-Driven Culture Enables Responsible Growth

- Named one of America's Greatest Companies
- Named one of America's Greatest Workplaces for Families and Parents
- Named one of America's Most Responsible Companies for six consecutive years
- Named one of America's Greenest Companies

# Acquisition Strategy

# Acquisition Criteria

Accelerate growth through acquisitions aligned with strategic vision

- Enhances our offering of highly engineered products serving critical process roles
- Serves end markets with attractive profiles; market-leading positions
- Broadens and strengthens our culture
- Demonstrates a history of consistent revenue with significant aftermarket exposure
- Established long-standing, deep customer relationships

# Global Growth Through Strategic Acquisitions

# Key Takeaways

## STRONG EARNINGS & PROFITABILITY

- Over 70% of revenue from aftermarket parts
- Excellent financial performance and free cash flow\* generation
- Strong business model with recurring revenue of high-impact solutions with “sticky” customer relationships

## PROVEN TRACK RECORD AS A SUSTAINABILITY LEADER

- Delivering engineered systems and technologies to enable sustainable industrial processing
- Helping customers advance toward sustainable manufacturing solutions
- Growing demand for environmentally friendly materials in end markets

## GROWTH-ORIENTED BUSINESS MODEL

- Growing end markets driven by global macro trends
- Focused capital allocation and proven record of accretive acquisitions
- Decentralized structure, asset-light operating model
- Focus on strategic innovation

# Notes

## PRESENTATION NOTES

- All references to EPS (earnings per share) are to our EPS as calculated on a diluted basis. Certain per share amounts in the tables may not foot due to rounding.
- Percent change in slide 39 for the first quarter is calculated using numbers reported in our press release dated May 5, 2026. Percent change in slide 39 for the full year is calculated using numbers reported in our press release dated February 18, 2026, except for adjusted operating income and adjusted EPS which is calculated using numbers reported in our Form 8-K filed on February 23, 2026.

## FOOTNOTES

- 1) Source: Statista May 2026.
- 2) Source: National Conference of State Legislators. Retrieved May 3, 2023 from <https://www.ncsl.org/state-federal/infrastructure-investment-and-jobs-act>.
- 3) Adjusted return on invested capital (ROIC) is calculated based on adjusted net income, excluding intangible amortization, over consideration paid net of cash acquired. Average adjusted ROIC is calculated using the adjusted ROIC for each acquisition represented on slide 29 weighted based on consideration paid net of cash acquired.
- 4) Leverage ratio is calculated by dividing total debt by EBITDA. For purposes of this calculation, EBITDA is calculated by adding or subtracting certain items from Adjusted EBITDA, as required by our amended and restated credit facility (“Credit Facility”). Our Credit Facility defines total debt as debt less worldwide cash of up to \$50 million.
- 5) Net income represents net income attributable to Kadant.
- 6) Net debt is calculated based on total debt less cash, cash equivalents and restricted cash.
